

Book review of Man of Faith by Ernie Fornoles

I was a bit ambivalent to read this book, Man of Faith. I thought I would encounter theological terminologies and passages that only a Bible school graduate can understand – which I am not.

But in simple and understandable way, Lim Kou shared important insights on Biblical faith – where it comes from and how it grows. Citing examples of people in the Bible who lived in faith the truth from God that was revealed to them, he clearly showed that understanding and living out Biblical faith is possible and achievable. That even ordinary man like me can grow in the kind of faith God desires.

This book served as a wake-up call for me and hopes it would serve the same purpose for others who will encounter this book. Also I would recommend this book, Man of Faith to be taught in Sunday School classes where both the teacher and student can really have a good foundation and knowledge of Christian faith.
